PLATO News:

March 28, 2019

Dear PLATO consortium,

It is my pleasure to inform you about the **successful Payload Preliminary Design Review (P/L-PDR)** close-out meeting at ESTEC yesterday, March 27th.

ESA certified that PLATO has achieved all the criteria to succeed the P/L-PDR. We mastered an important milestone.

I would like to thank the whole team for the enormous efforts made. It was possible to reach this milestone only due to the constantly high motivation in the PLATO team at all levels. PLATO continuous, you keep it moving ahead.

Next steps are the already ongoing Unit PDRs. In 2021 we will have to deal with the Payload Critical Design Review (P/L-CDR) and with the Camera Series Production Readiness milestone.

Thank you again. It is a pleasure working with you all!

Heike Rauer
(Payload Consortium PI)

Upcoming events:

15-17 April 2019 PLATO Week 8, Graz, Austria

24-26 Sept 2019 PIC Workshop, Padova, Italy
